

Question 7

1. Select the Firewall rules whose logs are required (krutik-assessment-allow-ssh-qips, in this case)
2. Ensure that Logs are On
3. Also ensure that the user you are signed in currently has a Logging Admin Role or equivalent role to allow and create sinks for exporting
4. Now Navigate to Logging and set the filter to the desired firewall to view the logs
5. Now click on Create Export
6. Assign a name to the sink for exporting
7. Select the Sink Service as BigQuery and Assign it to a desired Dataset or create a new one in Bigquery
8. Lastly click on Create Sink to create and export the logs
